DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, drawn to a packaging material, classified in class 428, subclass 425.9.
 - II. Claims 4-15, drawn to a method of packaging a semiconductor die, classified in class 438, subclass 112.
 - III. Claims 16-24, drawn to a semiconductor die, classified in class 257, subclass 787.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed could be used in a materially different process that could comprise introducing the packaging material using a sealing apparatus where the material is pumped into the orifice formed by two molds and encapsulates the semiconductor die.
3. Inventions III and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are

shown to be separately usable. In the instant case, invention I has separate utility such as for embedding piezoelectric sensors/actuators. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
